Kartik Jagdale

Senior Software Engineer (Frontend) | Angular, ReactJs, Typescript,
JavaScript | Frontend Development Expert
Netherlands

Summary

Hi, I am a Frontend Engineer with 10+ years of experience in building scalable and flexible web applications in Angular 21+ as a Client-Side Framework. Technical skills: * Angular 21+ * NgRx / NgRx Effects / NgRx Actions / NgRx Store / NgRx DevTools/ Claude/ Agentic AI/ * HTML/ HTML5 / CSS3 / SASS / LESS / Bootstrap / Ng Bootstarp / Foundation / Semantic UI / Material / Clarity / Prime NG* Javascript / Typescript / ES6* AJAX / JQuery / RxJs* JSON / YAML / XML* AWS / Heroku / Firebase* Node / Yarn / NPM / Hex* Slack / Appear.in / Jira / Basecamp / Asana / Trello / Pivotal Tracker / Skype / Gmail* Ubuntu / Windows / Mac* TDD / Agile / XP / SCRUM / Kanban / Continous Integration* Git / Vim / Zsh / Sublime / VSCode* Jest* MicroFrontend / Web Components / Lerna / Monorepo* StencilJs / Lit Element* Service Integration: Google / Facebook / Instagram / Twitter / Stripe / Billdesk / CAMS / Karvy / Accordfintec / NSDL Pan Verifcation / Dialogflow* Code Quality Tools: TsLint / Eslint / HuskyNon-Technical Skills:* Team Leadership* Strong Communication skills* Effective Time and Work Management* Able to work in large and diverse Teams* Strong problem solving* Effective Project management less

Experience

Zivver

Senior Software Engineer

November 2024 - Present (1 year 7 months)

Amsterdam, North Holland, Netherlands

1. Worked on migration of Email Webapp from Angular 1.x to Angular 18+
2. Improved web accessibility of components and application as whole for WCAG audit and wrote RFCs to add keyboard shortcuts.
3. Migrated customer feedback collection from Lime Survey to an Internal Customer Effort Score tool which we build in house.
4. Did code reviews to maintain quality and follow our internal coding standards.

5. Managed release process: version tagging and deployments to staging and production environments.
6. Mentored junior developers and Interns and supported on boarding of new team members.
7. Continuously collaborated across multiple teams and with Backend Team, UX designers, Product Owners, Product Managers, QA's and DevOps team from requirement gathering to successful release to production.
8. Prioritized P0 defects to ensure smooth customer experience.
9. Tech Stack: Nx monorepo setup with Angular 18+, TypeScript, RxJS, NgRx, and GitLab CI/CD.

Synechron

Lead - Technology

April 2023 - October 2024 (1 year 7 months)

Pune, Maharashtra, India

1. Received Outstanding Performance award and Employee of the Month Award for implementing the innovative "Coverage Team Setup" feature that streamlines the bulk assignment of officers to multiple clients, offering a solution that will greatly benefit our bankers by saving them countless hours that were previously spent on manual assignments.
2. Actively participating and lead the design, development of ongoing migration project from AngularJS 1.4 to Angular 14+, ensuring the application is using modern development practices and improving performance.
3. Utilising Web components and a Micro Frontend Architecture using Nx MonoRepo Library for migration, employing technologies such as RxJs, NgRx state management library, HTML, SCSS, TypeScript, and Angular's advanced features to enhance scalability.
4. Efficiently managing legacy systems, maintaining the codebase, ensuring error-free operation, and promptly and quickly addressing ad hoc client requests ensuring operations run smoothly.
5. Worked heavily on Angular AgGrid Library and customising it to suit various client needs and preferences.
6. Managing end-to-end deployment processes, from building and packaging for UAT and PROD deployment and testing, with the help of tools like Teamcity and Udeploy.
7. Employing JIRA for effective project life cycle management, task estimations, and bug tracking.
8. Encouraging cross-team communication and collaboration in an agile work environment, facilitating improved project coordination and delivery.

9. Translating client expectations into actionable development tasks, aligning efforts with client expectations, ensuring all client requirements are met and projects are delivered successfully.
10. Maintaining high-quality codebases through rigorous code reviews and oversight of merges.
11. Developing and maintaining comprehensive technical documentation using CompoDoc.

Novisto

Senior Frontend Developer (Independent Contractor)

November 2022 - February 2023 (4 months)

Montreal, Quebec, Canada

Participation in front-end development in the Angular application

- Developed and maintain user-facing features
- Written Behaviour Driven Unit Tests for the application
- Contributed to the application's libraries and architecture
- Created user-friendly interfaces using HTML, Angular components, and Material UI
- Monitored and optimised the performance and usability of the application

Collaboration with other team members and stakeholders

- Participated in code review processes with other developers
- Participated in sprint activities with the development team and product team
- Provided time estimates for assigned tasks
- Collaborated with developers to groom tasks and features
- Communicated with UI designers and product owners about UI/UX designs

Coditas

Frontend Engineer

August 2019 - October 2022 (3 years 3 months)

Pune Area, India

1. Actively involved in development processes since discovery phase till UAT of re-designing an e-commerce project which involved creating and analyzing POCs, implementation, testing, applying WCAG guidelines, and documentation of web components, SDKs, and utilities used across the entire app.
2. Active collaboration in Designing and Architecture of Javascript SDKs and employed Lerna MonoRepo manager for the creation of JS-SDK's.
3. Extensive use of Angular, Javascript, and Typescript and Web Component libraries like Lite element, Stenciljs, and Polymer.

4. Employed Prettier, Husky, Lighthouse, and other technology to make line-code repairs and optimize code and website presence.
5. Implemented, published, and executed detailed unit and functional testing for SDKs, Web Components, and MicroApps.
6. Implemented, documented, actively optimized, and refactored JS-SDKs.
7. Strong understanding of WCAG principles and guidelines.
8. Documented and employed WCAG checklist for creating web components and micro frontends for teams to follow.
9. Implemented and Utilised Analytics SDK in MicroApps.
10. Integration of third-party APIs like SAS, Google Analytics, Matamo.
11. Actively involved in effort estimation, deployment plans, test plans, and peer code review providing insights, suggestions, and better approaches for the developed feature.
12. Received appreciation for creating utilities like window-manager SDK which manages window objects and resolves the security issues of the object stored at the window level.
13. Recognized and rewarded a Bright Idea award for introducing coding conventions and enforcing them with pre-commit hooks.
14. Actively supported cross-team by quick resolution of queries, bugs, and deployed features.
15. Mentoring and Training the new hires and interns on Angular 13+ Framework, Javascript, and Typescript language, Ngrx, Micro Frontends, and Web Components.

Jombay

Frontend Engineer

July 2018 - May 2019 (11 months)

Pune Area, India

1. Development and Maintenance of New and Existing Products.
2. Communicating with Product and Design teams for Spec and Design discussions.
3. Training developers in Angular Framework and Javascript Language.
4. Run debugging tools such as Firebug, Chrome Inspector and Lighthouse to eliminate flaws and glitches prior to publishing.
5. Oversaw frontend issues and troubleshooting requests to resolve surfaced problems.
6. Applied latest emerging technology, software and project application trends to update and maintain site applicability.
7. Implemented website maintenance, content management, updates and security resource tutorials to assist end-user training.

Aviabird

Full Stack Developer

January 2016 - April 2018 (2 years 4 months)

Pune

My Responsibilities at Aviabird Included:

1. Delivered performance-driven and user-centric websites that met all business requirements.
2. Reviewed code, debugged problems and corrected issues.
3. Managed milestones from initial steps through final delivery.
4. Took initial concepts and developed project plans.
5. Designed strategic plan for component development practices to support future projects.
6. Provided methodologies for object-oriented software development and efficient database design.
7. Collaborated with clients from concept through final delivery of product or service.
8. Participate in regular conference calls with client and BA team.
9. Understand business needs of client to develop website requirements.
10. Develop iterative prototypes based on requirements in an agile environment using Ruby on Rails, AngularJS, Elixir, Phoenix using TDD Approach.
11. Design and develop software architecture that is reliable, scalable, and high performance
12. Documenting Code.
13. Debug, monitor, and troubleshoot solutions.
14. Run quality tools on the app like codacy, mini profiler, RBP , rubycritic, RuboCop and refactor existing code for performance optimization.
15. Actively involved in effort estimation, deployment plans, test plans and peer code reviews
16. Mentoring and Training the new hires and interns on Ruby on Rails, Angular 4+, Elixir, Phoenix
17. Resolving critical architectural/implementation issues and provided optimized solutions to the Client.
18. Consistently met deadlines and requirements for all production work orders.
19. Proposed technical feasibility solutions for new functional designs and suggested options for performance improvement of technical objects.
20. Proposed, Designed and executed new management process in company for infrastructure support and development.

Amazon

Customer Care Associate

October 2015 - January 2016 (4 months)

Pune

Summary:

Responsible for acting as a liaison between customers and companies. Assists with complaints, orders, errors, account questions, billing, cancellations, and other queries.

Education

JSPM's Rajarshi Shahu College of Engineering

Bachelor of Engineering - BE, Computer Engineering · (May 2011 - June 2015)

D. Y. Patil College of Engineering (DYPCOE) , Akurdi, Pune

High School Diploma, Computer Engineering · (April 2008 - May 2011)
